LinkedIn | Portfolio | Tempe, AZ | (617) 390-4991 | shriya5dxt@gmail.com

Technical Skills

Programming Languages	Python, SQL, R, Java, HTML5, CSS, JavaScript, MATLAB, ETL/ELT
Databases	MS SQL, Vertica, Snowflake, Oracle, MongoDB, NoSQL, BigQuery, PostgreSQL, GCP
Libraries & Packages	Keras, TensorFlow, PyTorch, Flask, PPTx, NumPy, Scikit-learn, Lambda functions, PySpark
Visualizations	Tableau, Power BI, Excel, Informatica, Alteryx, Looker, ggplot, Plotly
Other	Git, dbt, Dimensional Data Modeling, BI Tools, DAX, OLAP, Data Governance, Agile, SQL Server, AWS, Databricks, VBA, LLMs, Google Cloud, Azure Databricks

Work Experience

Amazon, Tempe, USA, Business Analyst **Jul. 2024 – Present**

- Built **COACH**, an automated carrier performance-management system evaluating 6,400+ carriers in the U.S. prepaid network against business thresholds, replacing a manual review process that covered only 3.9% of carriers weekly
- Developed **executive reporting automation** (FIST flash reports and carrier FPY analytics) in Python and SQL, generating weekly HTML dashboards for leadership and cutting manual reporting effort by ~6 hours per week
- Engineered a serverless **manifest accuracy analytics pipeline** on AWS Lambda, Python, and Redshift, computing shipment-level metrics and publishing interactive dashboards that replaced recurring ad-hoc analysis
- Built a full-stack **Electron/React desktop application** integrating Python scripts for XML-to-Excel conversion, ISA data extraction, and automated email generation, streamlining carrier operations
- Automated carrier compliance verification with USDOT/SCAC validation scripts (cutting onboarding checks from 3 days to minutes) and authored 30+ production SQL queries for Weekly Business Review metrics (FPY, NCNS, OTA, White Glove) across U.S. and Canada

Mimecast, Lexington, MA, USA, Data Engineer **Jan. 2023 – Aug. 2023**

- Developed and optimized dbt models with engineers and product owners, ingesting into Snowflake and reducing ELT runtime from 12 hours to under 20 minutes
- **Enhanced data quality and governance** by leading the migration of Tableau workbooks and flows from Tableau Server to Tableau Cloud, achieving a 40% reduction in migration time
- Conducted data analyses and presented KPIs to stakeholders, identifying 10 high-impact workbooks

Northeastern University, Boston, USA, Data Engineer **Aug. 2022 – Jan. 2023**

- Automated Snowflake ETL/ELT using Alteryx Designer, dbt, and Informatica Cloud, achieving an 80% efficiency increase
- Created a real-time Tableau dashboard enabling finance teams to find cost-saving opportunities, cutting expenses by 15% and saving 20+ man-hours weekly

HP Inc., Bangalore, India, Data Engineer (Customer Experience) **Jan. 2020 – Jan. 2022**

- Engineered a custom BERT model (NLP/LLMs) for hierarchical issue detection across 30M customer requests in 50+ languages, plus PyTorch sentiment analysis
- Directed a CX team building a **Python pipeline** and Tableau dashboard for HP's global printers, cutting resolution time by 20%, saving \$1.5M annually, and reducing Databricks GPU cluster costs by \$10,000/month
- Pioneered a Python **ETL pipeline** in **Azure Databricks**, achieving 90% automation for weekly large data loads
- Delivered end-to-end analytics from problem statement to deployment with a **Tableau dashboard**, cutting customer support issues by 25% in the Weak Signals project

Academic Projects

Customer Complaint Management Database System | SQL, Tableau, Schema Design, Oracle – PL/SQL

- Designed an Oracle complaints database with ER diagrams, normalized schema, and ACID transactions to track and resolve product, account, and service issues

Building a Robust API | JSON, Elasticsearch, Redis, Spring Boot, Postman, MongoDB, VSCode

- Implemented a REST API for structured JSON data with CRUD, merge, and delete functionality, plus validation and a detailed schema

Amazon Product Review Text Mining | Python, NLP, Pandas, Machine Learning Algorithms, NumPy

- Employed Python-based verbatim analysis with the PyATE framework to identify common electronic product issues

Education

Northeastern University, Master's in Information Systems, Boston, USA

Coursework: Database Design, UI/UX, Web Design, Data Science Engineering Methods, Data Structures
